ELSEVIER

European Journal of Operational Research 103 (1997) 635–636

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

Contents Volume 103

1 Quantitative models for reverse logistics: A review
M. Fleischmann, J.M. Bloemhof-Ruwaard, R. Dekker, E. van der Laan, J.A.E.E. van Nunen and L.N. Van Wassenhove

18 A network approach to trip frequency scheduling for bus routs in heavily congested cities
M. Sinclair and D.L. van Oudheusden

28 Estimating returns to scale in DEA
B. Golany and G. Yu

38 A Multicriteria Decision Aid approach for energy planning problems: The case of renewable energy option
E. Georgopoulou, D. Lalas and L. Papagiannakis

55 Nervousness in inventory management: Comparison of basic control rules
T. de Kok and K. Inderfurth

83 The option value of advanced R&D
E. Pennings and O. Lint

95 A multi-level composite heuristic for the multi-depot vehicle fleet mix problem
S. Salhi and M. Sari

113 A two-machine preemptive openshop scheduling problem: An elementary proof of NP-completeness
A.A. Gladky

117 Allocation of warehouse inventory with electronic data interchange and fixed order intervals
R. Ernst and B. Kamrad

129 An efficient heuristic for scheduling in a flowshop to minimize total weighted flowtime of jobs
C. Rajendran and H. Ziegler

139 An evaluation of due date, resource allocation, project release, and activity scheduling rules in a multiproject environment
K.-K. Yang and C.-C. Sum

155 Multifleet routing and multistop flight scheduling for schedule perturbation
S. Yan and Y.-p. Tu

170 Relative risk–value models
J.S. Dyer and J. Jia

186 Handling missing prices in a thinly traded stock market: implications for the specification of event study methods
J.-P. Kallunki

198 A tabu search Hooke and Jeeves algorithm for unconstrained optimization
K.S. Al-Sultan and M.A. Al-Fawzan

209 Exact algorithms for the stochastic shortest path problem with a decreasing deadline utility function
I. Murthy and S. Sarkar

230 Investigation of path-following algorithms for signomial geometric programming problems
H.-H. Yang and D.L. Bricker

242 An analysis of the impact of chaotic dynamics on management information flow models
C. Riggle and G. Madey

255 Models for 1-out-of Q systems with stochastic lead times and expedited ordering options for spares inventory
T. Dohi, T. Shibuya and S. Osaki

273 OR Software
H. Thiriez

275 Artificial intelligence tools for decision support systems (*Editorial*)
C. Rosenthal-Sabroux and P. Zaraté

277 A comparative study of methodologies for designing IDSSs
A. Blair, J. Debenham and J. Edwards

296 Knowledge acquisition issues in the design of decision support systems in quality control
V. Deslandres and H. Pierreval
312 Comparison of some AI and statistical classification methods for a marketing case
D. Montgomery, G. Swinnen and K. Vanhoof
326 Driving Tabu Search with case-based reasoning
S. Grolimund and J.-G. Ganascia
339 Financial decision support with hybrid genetic and neural based modeling tools
N. Kumar, R. Krovi and B. Rajagopalan
350 Supporting a complex audit judgment task: An expert network approach
J.T. Davis, A.P. Massey and R.E.R. Lovell II
373 A framework for group decision support systems: Combining AI tools and OR techniques
N.I. Karacapilidis and C.P. Pappis
389 Negotiation support systems: A multi-criteria and multi-agent approach
B. Espinasse, G. Picolet and E. Chouraqui

411 *Q*-analysis for modeling and decision making
L. Duckstein and S.A. Nobe
426 Two engineering applications of a constrained shortest-path model
A.A. Elimam and D. Kohler
439 Heuristics for scheduling in a Kanban system with dual blocking mechanisms
B. Sharadapriyadarshini and C. Rajendran
453 Role of design-philosophies in interfacing manufacturing with marketing
N. Balakrishnan, A.K. Chakravarty and S. Ghose
470 Does cooperation in auditing matter?A comparison of a non-cooperative and a cooperative game model of auditing
J. Cook, D. Hatherly, L. Nadeau and L.C. Thomas
483 Ensuring quality in resource constrained project scheduling
O. Icmeli-Tukel and W.O. Rom
497 Tool planning models for flexible manufacturing systems
Z.M. Mohamed and J.J. Bernardo
515 Storage controlled pile-up systems, theoretical foundations
J. Rethmann and E. Wanke
531 Simulation techniques for the sensitivity analysis of multi-criteria decision models
J. Butler, J. Jia and J. Dyer
547 A branch and bound algorithm for the two-stage assembly scheduling problem
A.M.A. Hariri and C.N. Potts
557 Reordering strategies for a newsboy-type product
H.-S. Lau and A.H.-L. Lau
573 Optimal ordering and pricing policies in a single-period environment with multivariate demand and markdowns
T.L. Urban and R.C. Baker
584 The asymptotic value-to-capacity ratio for the multi-class stochastic knapsack problem
T.-E. Lee and G.T. Oh
595 Dynamic server assignment in a two-queue model
O.J. Boxma and D.G. Down
610 Minimizing waiting times in integrated fixed interval timetables by upgrading railway tracks
K. Nachtigall and S. Voget
628 Operations research applications in Taiwan: A linguistic approach
C. Kao and S.-T. Liu
635 Contents Volume 103
637 Acknowledgement to Referees
642 Invited Reviews 1993–1997
644 Feature Issues 1988–1997
646 Keyword Index Volumes 96–103
652 Author Index Volumes 96–103
666 Book Review Index Volumes 96–103
